**1. One Story, Two Voices**

First Author: Julie Goldman  
Other Author: Dr. Lidia Schapira  
Discussion led by Bill Zeckhausen.

“Not every patient can be saved, but his illness may be eased by the way the doctor responds to him. In doing so the doctor may save himself. He has little to lose and everything to gain by letting the sick man into his heart.”  
Anatole Broyard, Intoxicated by My Illness.

These words pose challenge for the caregiver-patient relationship. What risks and rewards might arise? *One Story, two Voices*, produced by the Kenneth B. Schwartz Center ([www.theschwartzcenter.org](http://www.theschwartzcenter.org)) seeks answers through a doctor-patient interview. A cancer patient and her oncologist transform their relationship by sharing the most difficult medical happenings they face together, ranging from treatment failure to an unexpected, near-death crisis. They strengthen communication precisely where it could break down. Discussion will follow the video.

Objectives of this package include that the learner will:

- \* identify psychosocial issues in patient care
- \* increase appreciation for integrating doctor/patient viewpoints
- \* recognize new opportunities to foster support and partnership with patients.
